

Studiologic SL-880 88-Key Piano-Weighted MIDI Keyboard Controller for Sale

Asking Price - \$350.

Available for local pick-up only (Acton, MA). Willing to deliver locally. Due to piano-action keys, this keyboard is heavy.

Sparingly used, in excellent working condition, and only used in the studio. With original packaging, manual, and power supply.

The Studiologic SL-880 PRO 88-Key Hammer-Action Controller functions as a MIDI controller only, with **no internal sounds**. This MIDI controller has realistic piano action versus others that may have synth-weighted keys. This keyboard can be connected to a MIDI sound module, PC, iPad, etc. via common 5-pin MIDI I/O interfaces.

Keys are velocity and after-touch sensitive. Controls include pitch-bend and modulation wheels, 4 buttons for the enabling and disabling of 4 keyboard zones, enter/edit buttons, 2 scroll buttons, 10 LEDs indicating active parameter, 4 LEDs indicating active zone. Features include 4 zones for splits and programmable layers, a numerical keypad corresponding to the keys of the central octave, memory for storage of the last-used zone parameters, 8 zone-specific velocity curves, 8 global velocity curves, 2 parallel MIDI outputs, sustain input jack, and volume input jack.

If you need a stand-alone MIDI sound module, I can sell you a **Suzuki GM Sound Expander Module** that has multiple sounds. Please enquire for price of that module if interested.
